

EXECUTIVE SUMMARY

Product leader with 20+ years driving digital transformation across Asia, Europe, Americas, and Middle East. Delivered €50M+ business impact through strategic portfolio management, accelerated go-to-market execution, and data-driven decisions. Led cross-functional teams of 40+ professionals launching award-winning B2B/B2G SaaS and hardware solutions from concept to scale. Expert in optimizing product-market fit and exceeding KPIs across telecom, healthcare, and enterprise visualization sectors. Known for building high-performance teams and delivering measurable results.

KEY ACHIEVEMENTS

- **€1000M+ Revenue Impact:** *Transformed product portfolios across telecom, healthcare, and enterprise visualization, delivering measurable ROI through strategic roadmap execution and market expansion initiatives.*
- **National Digital Health Mission:** *Led India's national healthcare portal (ndhm.gov.in) from concept to Prime Minister's inauguration in 16 weeks, orchestrating five integrated software modules serving central and state government agencies.*
- **Nokia Global Software Solutions:** *Led ISO 27001:2013 certification program as lead program manager across 70+ global Nokia locations, coordinating with 700+ teams. Spearheaded LMS deployment, reducing training time by 75% and developed internal document management platforms, achieving 90% reduction in process turnaround time and 35% increase in client retention.*
- **Award-Winning Innovation:** *Directed development of two Red Dot Design Award-winning product families (ODL-721 & LVC-400), generating €1.2M revenue within 6 months and capturing 42% market share growth.*
- **Market Leadership:** *Scaled NEC India from 1% to 7% market share while increasing average deal size by 45% and achieving ₹60 Crores in annual revenue through consultative solution selling.*

CORE COMPETENCIES

Leadership & Collaboration

Cross-Functional Team Leadership • Executive Stakeholder Engagement • Sales & Marketing Alignment • Change Management • Digital Transformation • Team Development & Mentorship • Influence Without Authority • Vendor & Partner Management.

Revenue & Business Metrics

Revenue Growth & P&L Management • Annual RR/MRR Optimization • Customer Acquisition Cost • Customer Lifetime Value • Churn Reduction • Gross Margin Optimization • Net Revenue Retention

Product Strategy & Execution

Product Vision & Roadmapping • Portfolio Management • Product-Market Fit • Go-to-Market Strategy • Feature Prioritization • Product Lifecycle Management • Strategic Forecasting • OKR Framework • Pricing Strategy • Competitive Analysis • Market Research • Customer Success Management • Product-Market Fit Validation • Experimentation Framework • North Star Metrics • Value Stream Mapping

Product Methodologies & Growth

Agile (SCRUM, SAFe) PRD/MRD Development • Sprint Planning • Release Management • Lean Startup • Design Thinking • Jobs-to-be-Done Framework • Customer Journey Mapping • A/B Testing & Experimentation • Product Analytics • Product-Led Growth • Experimentation Framework • Technical Roadmap Planning.

Technical Product Development (Software & Hardware)

SaaS/PaaS Business Models • API Strategy & Management • Cloud Architecture • Platform Development • Microservices • System Integration • DevOps & CI/CD • Hardware-Software Integration • Product Engineering • Supply Chain Management • Bill of Materials (BOM) • Manufacturing Operations • New Product Introduction (NPI) • Regulatory Compliance (CE, FCC, RoHS, ISO) • Product Security & Quality Assurance

EDUCATION

- **Master of Business Administration (MBA)**, Marketing & International Business
GGs Indraprastha University, New Delhi | 2003–2005
- **Bachelor of Science (Hons), Computer Information Systems**
GGs Indraprastha University, New Delhi | 1999–2003

PROFESSIONAL EXPERIENCE

VICE PRESIDENT, SOFTWARE DEVELOPMENT (Contractual Assignment)

Savitri Telecom Solutions, Delhi, India | Jan. 2025 – Apr. 2025

Engaged as VP to define digital transformation roadmap and unlock growth opportunities for B2B telecom solutions provider during 4-month strategic engagement.

- Defined 3-year product vision and portfolio strategy for cloud-based service delivery transformation, identified and validated ₹7 Crores in new revenue opportunities within 3 months through competitive gap analysis and customer needs assessment.
- Led cross-functional teams across engineering, sales, and external partners to redesign client onboarding and service delivery workflows, achieving 40% reduction in cycle time through automation and process standardization.
- Applied **Reach Impact Confidence and Effort (RICE)** framework to prioritize 25+ roadmap initiatives, defined phased implementation plan balancing 6-month quick wins with 3-year strategic objectives.
- Delivered **Minimum Viable Product (MVP)** roadmaps across 3 product lines with quarterly milestones, established continuous feedback mechanisms with 15+ enterprise customers through structured prototyping sprints.
- Influenced C-suite and cross-functional stakeholders (technology, business development, operations) without formal authority, established product governance framework and quarterly review cadence adopted company-wide.
- Coached 12-member product and engineering team on agile methodologies and customer-discovery practices, documented best practices enabling team to sustain 30% velocity improvement post-engagement.

ASSOCIATE DIRECTOR, PRODUCT MANAGEMENT

Grant Thornton, Delhi, India | Jan. 2022 – Jun. 2024

Led product management and strategy for enterprise consulting practice, defining portfolio roadmaps, and delivering software solutions for Fortune 500 clients across telecom, finance, and digital transformation sectors.

- Defined and executed product portfolio strategies across multiple verticals, personally delivered consulting engagements generating over ₹20 Crores in client pipeline value through scalable software and process solutions.
- Served as lead program manager for ISO 27001:2013 certification across 70+ global Nokia locations, coordinating 700 teams while simultaneously directing product roadmaps for internal document management platforms and training portals.
- Identified training inefficiency gap and spearheaded end-to-end development and deployment of Learning Management (LMS) software, personally leading requirements gathering and feature prioritization to cut training time by 75%.
- Built in-house approval software for Nokia to eliminate opportunity loss from slow stakeholder approvals, owned product vision and execution reducing approval cycle from 18 days to 2 days.
- Applied Impact Confidence and Ease (ICE) scoring and MoSCoW prioritization frameworks to balance technical feasibility, value delivery, and speed-to-market across stakeholder groups.
- Embedded user testing, surveys, and feedback loops into development lifecycle, personally managed backlog grooming and Product Requirements Documentation (PRD) collaborating with engineering to deliver MVPs on time, achieving 35% increase in client retention and 90% reduction in process turnaround.

PRINCIPAL PRODUCT MANAGER

JSK Communications, Delhi, India | Sep. 2020 – Jan. 2022

Led product strategy and go-to-market execution for enterprise digital signage and video conferencing platform serving education, corporate, and government sectors across India.

- Defined product vision and multi-year roadmap for cloud-based collaboration platform, conducted customer discovery across 40+ enterprise accounts and usability testing with 200+ end users to validate product-market fit and feature prioritization.
- Orchestrated strategic customer engagement initiatives increasing enterprise account penetration by 42% and improved gross margins by 40% through value-based pricing strategy and solution bundling across three vertical markets.

- Collaborated with engineering team of fifteen to optimize platform architecture and API integrations, reduced system latency by 30% and improved service uptime from 97% to 99.5% through infrastructure modernization.
- Applied Impact Confidence and Ease (ICE) prioritization framework to evaluate 50+ feature requests, defined quarterly release roadmap balancing technical feasibility with business impact across stakeholder groups.
- Spearheaded development and launch of self-service ordering portal with integrated payment gateway, achieved 55% increase in conversion rates and reduced customer onboarding from 14 days to 3 days through workflow automation.
- Implemented A/B testing framework and built analytics dashboards tracking twelve key metrics including feature adoption, user engagement, and Net Promoter Score (NPS), drove continuous iteration achieving 25% improvement in customer satisfaction scores.

PRINCIPAL PRODUCT MANAGER

IQVIA, Delhi, India | Jun 2020 – Sept 2020

Recruited on emergency basis to deliver Government of India's National Digital Health Mission (NDHM) portal in 16 weeks for Prime Minister's Independence Day launch—a flagship healthcare digitization initiative for 1.3 billion citizens during COVID-19 pandemic crisis.

- Led end-to-end product development of national healthcare portal (www.ndhm.gov.in) from concept to launch, personally created wireframes and information architecture, delivered five mission-critical modules (health records, provider registry, insurance claims, telemedicine, analytics) across 28 states and 8 union territories during pandemic lockdown.
- Directed 16-week sprint delivery coordinating 12 central agencies and 15 state health departments remotely during national lockdown, ensured readiness for Prime Minister's Independence Day inauguration on August 15, 2020, under national scrutiny meeting stringent regulatory and security standards.
- Conducted 50+ stakeholder interviews and mapped 15 user journeys to inform architecture design, personally developed wireframes, and user interface specifications, balanced urgent pandemic response needs with long-term scalability for 3 subsequent releases.
- Managed and mentored team of 5 product managers, 2 developers, and 1 designer using Agile SCRUM with 2-week sprints during remote work constraints, created product marketing brochures and stakeholder communication materials, built customer-centric product thinking resulting in 40% increase in solution-market alignment.
- Established Objectives and Key Results (OKR) framework tracking 20+ KPIs, implemented A/B testing across 8 critical user flows, built real-time dashboards achieving 500K+ citizen registrations and 100+ facility onboarding within 30 days post-launch during pandemic peak.
- Collaborated with legal, cybersecurity, and compliance teams on HIPAA-equivalent standards, developed comprehensive product brochures for government stakeholders, delivered 25+ executive presentations and trained 200+ government officials enabling nationwide rollout supporting pandemic response infrastructure.

GENERAL MANAGER, PRODUCT MANAGEMENT & MARKETING

CVTE (Guangzhou Shiyuan Electronics Co., Ltd.), Delhi, India | Oct. 2019 ~Mar 2020

Engaged as senior strategic advisor to establish India market entry for China-based display technology manufacturer, provided expert direction on go-to-market strategy, competitive positioning, and regulatory roadmap for Interactive Flat Panel Display and LED product portfolio.

- Provided strategic direction for product portfolio, conducted competitive analysis of 15+ players, defined differentiated positioning, and identified ₹50+ Crores untapped opportunity across education, corporate, and government sectors.
- Led strategic development of integrated soundbar line addressing video conferencing demand, coordinated with China-headquartered R&D on software-hardware feature integration, led New Product Introduction (NPI) activities preparing market launch readiness.
- Formulated segment-specific pricing models across 3 verticals through value engineering, established frameworks balancing competitive positioning with margin optimization adopted by regional leadership.
- Directed global marketing collaboration on launch strategy and India market positioning, created technical white papers and competitive battle cards, developed training curriculum for 50+ channel partners.

- Established regulatory compliance framework for wireless equipment importation, e-waste management, and lifecycle governance, provided expert direction on BIS, CE, FCC, and RoHS certification pathways.
- Transitioned strategic frameworks, market intelligence, NPI documentation, and implementation roadmaps to successor leadership upon COVID-19 pandemic onset ensuring business continuity.

SENIOR MANAGER, PRODUCT MANAGEMENT

IQVIA, Delhi, India | Apr 2019 – Oct 2019

Brought in to revitalize Incarnus healthcare software platform struggling with market traction, tasked with defining product strategy, optimizing pricing models, and accelerating revenue growth for life sciences and healthcare delivery networks.

- Defined product vision and strategy for Incarnus healthcare platform serving pharmaceutical companies and healthcare providers, conducted competitive analysis and user segmentation to develop pricing models and commercial strategies driving measurable revenue uplift and partner acquisition.
- Directed full product lifecycle from ideation through go-to-market using Impact Confidence and Ease (ICE) scoring and Return on Investment (ROI) forecasting models, prioritized features based on market demand, technical complexity, and business impact.
- Conducted 30+ stakeholder interviews and usability testing sessions with healthcare providers and pharmaceutical clients, created feature prototypes to validate assumptions and refine product roadmap based on real-world clinical workflow requirements.
- Collaborated across engineering, customer support, and marketing teams to optimize delivery velocity and release planning, established analytics dashboards tracking feature usage and post-launch adoption metrics enabling data-driven iteration.
- Mentored team of 5 junior product managers on customer-centric product thinking, Jobs-to-be-Done framework, and data-driven prioritization methodologies, resulting in 40% increase in sales funnel values and stronger solution-market alignment.
- Influenced stakeholders across business, technical, and compliance units without formal authority, aligned cross-functional teams around shared Key Performance Indicators (KPIs) and iterative delivery milestones achieving consensus on strategic direction.

GLOBAL PRODUCT MANAGER

BARCO, Noida, India | May 2014 – Dec 2018

Appointed to lead global product development and commercialization for enterprise visualization solutions serving control rooms, command centers, and mission-critical operations across Europe, Asia, and Americas for Belgium-headquartered technology leader.

- Led end-to-end development and launch of two Red Dot Design Award-winning product families: laser illumination rear projection displays (ODL-721 Family) and networked video wall processors (LVC-400 Family), directed cross-functional teams across R&D, software, hardware, service, production, and marketing executing product design, customization, and go-to-market strategies across 3 continents.
- Implemented Voice of Customer (VOC) programs and built analytics dashboards tracking user engagement and adoption metrics, conducted post-launch refinements using feature adoption data, customer interviews with 50+ enterprise clients, and usage telemetry achieving continuous product-market fit optimization.
- Achieved €1.2M revenue within 6 months of LVC-400 launch increasing market share by 42% in networked video wall processor segment, streamlined digital ordering process through workflow automation eliminating reorder issues and reducing order cycle time by 80%.
- Implemented Voice of Customer (VOC) programs and built analytics dashboards tracking user engagement and adoption metrics, conducted post-launch refinements using feature adoption data, customer interviews with 50+ enterprise clients, and usage telemetry achieving continuous product-market fit optimization.

- Established strategic partnerships with 25+ system integrators and regional distributors expanding footprint across Europe, Asia, and Americas, co-led pricing strategy with finance and sales teams aligning channel economics with margin targets achieving 35% gross margin improvement.
- Monitored Software-as-a-Service (SaaS) adoption performance using Monthly Recurring Revenue (MRR), Annual Recurring Revenue (ARR), and Time to First Value (TTFV) metrics, optimized onboarding workflows and feature adoption driving 60% increase in customer lifetime value.
- Influenced cross-regional stakeholders across Belgium HQ, European R&D, Asian manufacturing, and Americas sales, aligned cross-departmental Objectives and Key Results (OKRs), and championed shared roadmap vision achieving 100% on-time delivery across global product launches.

NATIONAL MANAGER, PRODUCT MANAGEMENT & SALES

NEC India Pvt. Ltd (NEC Corp., Japan), Delhi | Apr 2010-May 2014

Appointed as National Manager with dual accountability for Product Management and Sales, tasked with transforming NEC's Multimedia Products Group from pure reseller to full-service Audio-Visual/IT solutions provider while driving national revenue growth across government, enterprise, and public infrastructure markets throughout India.

- Transformed business model from product reselling to integrated solutions delivery leveraging dual product and sales leadership, grew market share from 1% to 7% and increased average deal size by 45% within two years through bundled solutions and tiered pricing strategies, personally drove ₹60+ Crores annual revenue leading national sales team while aligning product strategy with business development initiatives.
- Established end-to-end product management processes for visualization portfolio integrating MoSCoW prioritization and agile feedback loops, forged strategic OEM partnerships with Cisco, Extron, Kramer, Crestron, and JBL, directed cross-functional teams across product, engineering, channel management, and sales enablement executing go-to-market strategies and revenue targets.
- Led product development, sales strategy, and deployment of high-value government and enterprise solutions: Public Information System (₹5 Crores), Nokia's inhouse information display and AV automation across 3 Network Operations Centers (₹4 Crores), Indian Oil Corporations 24/7 Process Monitoring at refineries including Panipat Refinery HQ at NOIDA, personally closed strategic deals and managed client relationships at C-suite level.
- Directed national sales operations and product roadmap for integrated solutions including Network Operation Setup for Coil Technologies (facility monitoring, live streaming, video conferencing, marketing showcase at Gurgaon), PVR entertainment solution for theatrical releases and CSR initiatives, and Passenger Information System at T3 Terminal Indira Gandhi International Airport (2012)
- Implemented performance dashboards for tracking sales pipeline, channel performance, and resource allocation, driving customer validation in 40+ enterprise accounts, through solution presentations, prototype reviews, and pilot deployments, personally led contract negotiations and deal closures across government, banking, and telecom sectors.
- Influenced internal NEC stakeholders at Japan headquarters and Asia-Pacific leadership without direct authority, coordinated cross-regional product and sales alignment, presented data-driven business cases securing budget approvals and strategic direction, built high-performance national sales team achieving consistent quota attainment and market expansion.

PREVIOUS EMPLOYERS:

- **NATIONAL MANAGER, SALES & PRODUCT MARKETING** | BenQ Corporation, Gurugram, India | 2009 – 2010
Led product marketing and enterprise sales initiatives for BenQ's professional projection portfolio.
- **GLOBAL MARKETING MANAGER** | British Telecom, Gurugram, India | 2008 – 2009:
